

GROW

25–30% of solid waste
comes from construction
GROW turns that
challenge into green jobs.

GROW Turn Waste in Wealth

Green skills for
construction waste
management &
recycling in Nigeria
& Mozambique

GROW strengthens TVET institutions to equip youth and workers with practical skills in construction and demolition waste (CDW) management, digital monitoring, and circular-economy entrepreneurship. We train technicians, upskill trainers and link learners to internships and local employers — all while promoting social inclusion (≥30% women) and open-access learning.

Benefits:

- **Practical skills:** selective demolition, material recovery, recycling.
- **Digital tools:** drones & smart glasses for site monitoring.
- **Jobs & entrepreneurship:** business incubator and job fairs.
- **Inclusion:** targeted outreach and gender-sensitive training.
- **Open resources:** English & Portuguese OER (CC BY-SA 4.0).
